**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to an Advanced Intelligent Network (AIN) including a service switching point (SSP) communicatively connected to a service control point (SCP). Each independent claim identifies the uniquely distinct features: regarding claim 1 (originally filed claim 21), causing the SSP to receive notice of initiation of an internet session by the user; causing the SSP to send a message to the SCP; causing the SCP to create an internet call entry including a telephone number of the user; causing the SCP to obtain an internet protocol address for the user; causing the SCP to enter the internet protocol address in the internet call entry; and causing the SSP to set a termination attempt trigger with respect to the telephone number of the user, whereby the internet call notification service is set up in response to the notice of initiation of the internet session so as to prompt creation of an internet call entry including the telephone number of the user, and whereby the internet call notification service is activated in response to obtaining the internet protocol address for the user, inclusion of the internet protocol address in the internet call entry, and setting of the termination attempt trigger with respect to the telephone number of the user. The closest prior art, Whittaker (US 6,125,177) and Shtivelman et al. (US 6,078,581) disclose conventional communication systems, either singularly or in combination, fail to anticipate or render the above features obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
